Premium Line

Outstanding features of the Premium Line by GermanSolar

- Only high-performance cells which have been thoroughly tested are used
- Use of 4 mm special-purpose glass
- Load capacity: 5400 Pa
- Can withstand extreme weather conditions (hail, snow, ice, sharply fluctuating temperatures, etc.)
- Outstanding design thanks to anthracite powder-coated solar panel frame and white backsheet
- Flash data for every panel
- Low chance of mismatching due to extremely low power tolerance of $\pm 3\%$

The product manufacturing process for PV generator components is based on glass film technology. In this process, the high quality of the laminate structure is achieved thanks to the composite film on the back side of the panel and the completely sealed edges. This ensures that the panel will have an extremely long life.

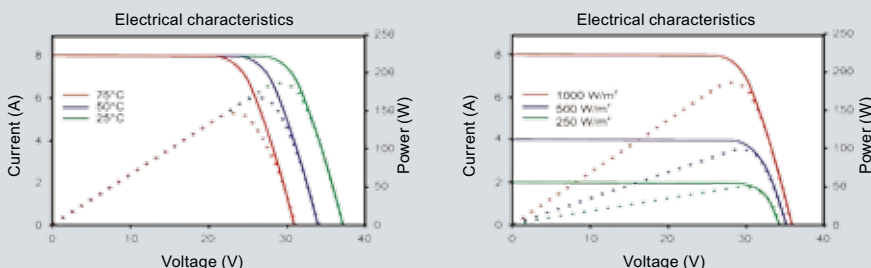

Certification

This special laminate is certified in accordance with IEC standards 61215 and 61730. ID: 0000023436 TÜV Rheinland.

Quality

The production facility is TÜV-, MCS-, IEC-, CE-, FSEC-, CEC-, CSA- and ISO 9001:2000-certified, and validated in accordance with EMAS II.

Regular individual inspections ensure that the products' electrical, optical and mechanical properties are always of the highest quality.

Subject to technical changes

Product shipped with the cables required to connect the panel (connector and plug-in system)

Length: 100 cm

All electrical values are based on perpendicular solar irradiation at 1000 W/m² and a temperature of 25°C (normal conditions with AM = 1.5).
